PS-5 Portion Control Scale

This dual-capacity unit (70 oz/1998 g) lets you switch from ounces to grams at the touch of a button. Lightweight at just four pounds, it is powered by four AA batteries (not included) or optional AC adapter. Push button tare, easy-to-read LCD and stainless steel platter make it perfect for fast-paced food operations of all kinds. This model certified by NSF.

DETECTO's PS-5 is at home in institutional or commercial settings where portion control is important.

PS-6 Portion Control Scale

With a capacity of 70 oz, this battery-powered scale features at-a-glance weighing. Simply read the LCD display for full ounces and then the accompanying bright red annunciator for appropriate 1/4 oz increment. Like its companion units, the PS-6 is extremely portable, easy to operate and easy to clean. This model certified by NSF.

Whether it's a salad bar priced by the ounce or any other food portioning operation where rapid readouts are key, the PS-6 gets the job done!

PS-8 Portion Control Scale

Thanks to its durable ABS enclosure, the PS-8 is the lightest of DETECTO's portion control trio, weighing in at just over two pounds (but measuring weights up to eight pounds). This scale is well suited to food service applications where recipes are written in pounds and ounces. Its brilliant red LED display also reads in pounds and ounces (not fractional pounds that have to be converted to ounces).

Simple one-key operation for on/off, zeroing and tare make the PS-8 a top performer in places calling for repetitive tare functions.

**Ask for the scales that pack a lot
 of power in a little package!**
